ROSS GLEESON

LECTURER

DESCRIPTION

Ross is a 37 year old male and works for Auckland University as a lecturer in 100 level Computer Science, he thoroughly enjoys his job. He enjoys technology and tries to remain up to date with all the best methods of teaching. Due to his busy schedule he must prioritise the best methods for teaching the course that take the smallest amount of time for him.

WORK EXPERIENCE

Activities:
- Teaches as a lecturer, this includes being available for asking questions and helping students with coursework
- Has a newborn child at home that takes up most of his spare time
- Enjoys building robots with arduino boards in the little spare time he has
- Does research for the university which takes up a lot of the time he has available at work

Attitudes
- Hard working and self-driven she strives to be the best in her class
- Goes to all lectures, up to date for all notes
- Incredibly studious, her highest priority is studying and university

Aptitudes and Skills
- Strong technology skills
- Empathetic and willing to try new things in order to help his students succeed

Motivations:
- To help his students pass and succeed as much as they can
- Spend as much time with his family as possible
- Finding more ways of assisting the students learning
- Use modern tools that can reach a wider range of students
- An easy method to check on the progress of the students
- Doesn't use the quizzes himself but interacts with the other side, updating and creating quizzes

Weaknesses:
- Busy, has little time to learn a complicated system
  Used to using the school systems and therefore would need significant improves to change the way he operates
